

NCS Accelerated Reader Online Parent/Student Agreement Grades K-5 2009-2010

Please read the following guidelines with your child for the use of our online Accelerated Reader program. Sign the agreement below and return to your child's homeroom teacher within 5 school days from receiving this document.

Accelerated Reader tests may be taken from any computer with Internet Access. Adult supervision is required. Students may take a test over a book that is on their assessed level. Students must read the entire book before testing. Children may read the book independently, with a parent, or have the book read to them. When beginning a test, the child should correctly choose whether or not they read the book independently or if it was read to them. This will affect the student report. Taking a test over a book made into a movie (without actually reading the book) is unacceptable. **Students may not have anyone else take tests for them.** Students may not have friends or siblings near the computer area while testing, just as this rule would apply in the classroom. Students reading on first grade level or below may have assistance with reading the test questions. The teacher reserves the right to ask students to take tests over particular books in the classroom. (example: book report books, classroom novels, etc.)

I, _____ parent or guardian of _____
