Science
Foreign Language

- The homework schedule is in place to help promote a balance between school work and home life. We believe it is very important for all our students to have time each day to focus on activities that are not school related.
- Each subject has designated days during the week where homework can be given. There may be days when a subject does not have homework even though it is their assigned day.
- Math and English should limit their homework to no more than 30 minutes a night due to being able to give homework each day.
 - AP and Dual Credit classes may exceed 30 minutes due to specific course requirements.

Test/Projects Schedule 2016 - 2017

Monday

- The test/projects schedule is in place to ensure that no more than 3 tests/projects are ever given or due on a single day.
- Subjects may test on their assigned day only, unless they communicate with another subject's teacher to ensure that no testing conflict occurs.
- Teachers will sign up for test slots on the block days. It will be limited to the first 3 to sign up per grade level.
