- The homework schedule is in place to help promote a balance between school work and home life. We believe it is very important for all our students to have time each day to focus on activities that are not school related.
- Each subject has designated days during the week where homework can be given. There may be days when a subject does not have homework even though it is their assigned day.
- Math and English should limit their homework to no more than 30 minutes a night due to being able to give homework each day.
 - AP and Dual Credit classes may exceed 30 minutes due to specific course requirements.
